For purposes of this evaluation, the most recent issue/edition of the Gourman Report or U.S. News and World Report authorities will be used. If more than one rating or ranking is submitted, an average of the rating and/or rankings will be calculated to determine the overall rating of the offer to be used for evaluation. The absence of a ranking, for averaging purposes, will be calculated as one integer below the lowest ranking listed in the authority used. For example, on a ranking scale of 1 to 10, with 1 being the highest and 10 the lowest, the unranked entity would receive a ranking of 11 for purposes of calculating the average."

5. Section M, paragraph M.1(b)(4)(i)(A) is amended to add the following:

"All information furnished in response to this factor rated equal, that offer which includes the most technical competencies within the program area or areas offered will receive a higher score for this factor."
